23rd February 2010

Dear Sirs,

I have been utilising the services of Commercial Utility Brokers (UK) Ltd since 2004, since when they have been responsible for the negotiation of the supplies to the southwest region office.

In 2009, Head Office approached me, as they wanted to review the group energy purchasing strategy. I was pleased to recommend CUB and they were successful in retaining our region and winning the group offices energy purchasing contract.

CUB has been a valuable partner over the past 6 years during some very turbulent times in the energy market and they have always been able to assist with any queries that we have had. CUB are currently looking into our next energy contract renewal, and we have asked them to request Green energy contract offers, which they have negotiated for us in the past.

I am pleased to be working with CUB and I would recommend any business to them without hesitation.

Yours Faithfully

Alison White  
Regional Management Accountant
