We have been working with Commercial Utility Brokers (UK) Ltd since we returned to them in March 2009, having originally had a working relationship starting in 2000. We have found their independent advice to be an invaluable asset to our business during some difficult times and we feel that we can rely on them to always put our interests first.

Commercial Utility Brokers (UK) Ltd have recently sourced a new electricity deal which has achieved a large cost saving for the business. We feel safe in the knowledge that they are always on hand to monitor the market on our behalf and support us going forwards.

I would be more than happy to recommend the services of Commercial Utility Brokers (UK) Ltd to any other company who are looking for a broker that can be relied upon to always be there to provide a professional and reliable service.

Jessica Baker – Chase Plastics Ltd
