We have been working with Commercial Utility Brokers (UK) Ltd since March 2008 when we were looking for a better way to approach the renewal of our utility contracts. They were able to arrange a contract for gas and electricity with a staggered start date, which picked up all the sites in our group and rolled them into a common contract end date, to tie in with our year end. This helped us to manage budgets going forward as we had a long term fixed price.

CUB were also very helpful in assisting us in the resolution of some issues we had with the billing for a couple of our sites. They were able to speak to the supplier on our behalf and resolve the issues we had, which saved us a lot of valuable time.

I would happily recommend the services of CUB to any business looking to simplify their utility contracts and for a helping hand in the resolution of billing problems.

Yours faithfully
