

McKenna has been dealing with CUB since 2003. I took over responsibility for the energy portfolio in 2005. I have always been impressed with the level of service that CUB have provided, it really does feel like you are dealing with a family business, which of course they are.

CUB has been very helpful, patient and resourceful in dealing with a number of issues that we have faced since 2005. I have always felt at ease knowing that I can just pick up the phone and speak to my account manager or another member of the team and my query will be handled in the most helpful manner.

I would be more than happy to recommend CUB to another business looking to build a long-term relationship with an honest energy consultant.
